

PRICE OF JUTE BAGS SHOW BIG ADVANCE

MANILA, P. I., June 25.—(Associated Press by Mail.)—The price of jute bags has risen to 20 cents each and as a result managers of sugar mills in the Philippines are investigating the feasibility of using some other fabric for bags in which to ship sugar. The Philippines will require 5,000,000 bags this season, which will cost \$1,000,000 at the present price asked by the jute mills of India.

We are not going to pay 20 cents apiece for sacks," said one sugar mill manager, who is in the market for a new one. "Before we do that we will have cotton sacks, which we can get laid down here for 15 cents each."

Another large sugar manufacturer believed that hemp would make a good sugar bag. He said:

Hemp will make a better bag than jute. It is possible to make from hemp and Japan has the mills for making hemp fibre. We shall take the matter up with these mills and see what can be done. If we can get a few million hemp bags we will be helping the local hemp industry and keeping more money in the country."

The price of jute bags from India has been steadily during the last year from 9 cents each to 20 cents.

AUSTRALIAN BOXERS DEFEATED IN ENGLAND

LONDON, July 10.—(Associated Press by Mail.)—Three Australian boxers, Albert Lloyd, George Cook and Frank Burns—came to England, and have been defeated, in fact so much so that they are now being packed up for the long journey home.

Filled with high expectations on the heels of what they had heard about the lack of real boxers in the British Isles, the trio of Australians came here and found they were not quite as proficient as they believed they were. Then they met some English boxers and the facts were demonstrated.

Also English critics say Frank Burns is the best of the trio. He was defeated by Kid Lewis, but he exhibited real pluck and undeviating ability that won him admirers. He is being urged to remain in England or to go to the United States, where, assert the critics, every boxer should acquire the finishing touches to his pugilistic education.

The most recent defeat of Lloyd, representative champion of the Antipodes, was administered by Arthur Timoney who won on points.

GERMAN CITIZENS GET COMPENSATION

PRINCETON, N. J., July 1.—(Associated Press by Mail.)—The government of Honduras has allotted to German merchants residing in that republic the sum of \$120,000 to indemnify them for losses suffered as a result of the "black lists" and other measures taken during the war, in which Honduras sided with the allies.

The committee of some portions of the local press is ironical. "Why," it is asked, "should the allies compensate German citizens for losses as a result of the war? Honduras has many urgent local needs for all the money it can spare."

FORD IS ENGAGING IN GLASS MAKING

DETROIT, July 25.—Henry Ford has launched upon a new enterprise that of glass making.

The manufacturer has established here and begun to operate a plant that will produce glass for automobile windshields. It is said to be the first plant in the country designed especially for making windshields.

The Ford production slogan "keep things moving" is playing a large part in the new methods introduced by the manufacturer in his latest field of endeavor. A continuous conveyor system makes it possible for the glass to be kept continually moving from the time it leaves the furnace in liquid form until it becomes a polished windshield.

The molten glass is drawn from the furnace and passes under a roller that gives it width and thickness, and then upon a moving conveyor that carries it 464 feet through a gradually cooling furnace. At the end it is cut and placed in another conveyor that carries it through the stages of grinding and polishing, after which it is ready for use.

JAPANESE CITY IS UNUSUALLY WEALTHY

KOBE, Japan, July 15.—(Associated Press by Mail.)—The city of Kobe finds itself in the enviable position of having a surplus of 2,000,000 yen from its 1921 municipal budget. The city has always budgeted liberally and collected taxes to cover the estimated expenditures to the last cent. Therefore, the happy state of the city's finance.

FRANCE FRESHENS UP LAST HOME NAPOLEON

PARIS, July 8.—(Associated Press by Mail.)—The French government having been persuaded to allow \$125 for the purpose, Napoleon's last home, on the island of St. Helena, is to have a new coat of paint. It needs it, for the last coat was applied on eight years ago.

The old house, at Longwood, is under the care of the French minister of the interior. He it was who induced the government to make the financial allotment. The new coloring will be exactly as in Napoleon's time, light gray for the house itself, with the shutters, cornices and doors in olive green and dark brown.

The Bonanza is not afraid and dares print all the news.

SAILOR'S STRANGE WILL IS PROBATED

LONDON, July 18.—(Associated Press by Mail.)—Strange as the story of any document told in fiction is that of a will which has just been admitted to probate and is now filed in Somerset House.

It is the last "will and testament" of a sailor, William Skinner, who lost his wife when his ship, the Indefatigable, was sunk in the battle of Jutland. It is in the form of the ordinary identification disc. On the one side, in the usual deeply-punched letters, appear the name, number, rating and religion of the man to whom it had been issued.

On the other side the disc appears at first sight to be just a circular piece of smooth polished brass. But when viewed at a certain angle, there can be seen about 75 minutely engraved words. With a microscope they can be plainly read. They constitute Skinner's will by which he bequeaths everything to his wife. The disc has been recovered from the sea with Skinner's body and on being cleaned revealed its secret.

PHILIPPINE SUGAR CROP IS GROWING

MANILA, P. I., June 15.—(Associated Press by Mail.)—An almost ideal planting season and co-operation of planters with the agricultural division of the Sugar Central Agency have combined to make the prospects for sugar in the island of Negros next year the best ever recorded in the islands, according to H. Aberton Lee, director of sugar can investigations for the bureau of science, who has just returned from Negros.

"Our problem in the Philippines," said Mr. Lee, "is to get sugar yields per acre up near the standard in other countries. Hawaii, for example, which averages around five tons an acre for a two-year crop. Our average in the Philippines is about one-sixth of that for a twelve or fourteen month crop. It will be seen that this is very unfavorable for the Philippines, and, of course, there is no innumerable reason for this as our soil is as good or possibly better than that of Hawaii, and our water supply and climate are more favorable."

"Use of fertilizer this year, on the crop now growing, is doing a great deal toward better yields of sugar in Negros. Estimates have been made 1923 will be 50 per cent above the crop just yielded in certain districts."

PENNSYLVANIA SENDS EXHIBIT RIO DE JANEIRO

PHILADELPHIA, July 27.—How the state of Pennsylvania has helped the victims of industrial accidents to fit themselves to earn a living despite the handicaps of blindness, paralysis and artificial limbs will be shown in an exhibit of lantern slides which the state is preparing for the international centennial exposition at Rio de Janeiro, Brazil, in September.

The slides, made from photographs of persons in training for employment under direction of the state bureau of rehabilitation, are being arranged by the federal board of vocational education. They will form an important part of the government exhibit at the exposition in celebration of the 100th anniversary of the independence of Brazil.

Most of the slides depict stories of specific cases handled by the rehabilitation bureau. For instance, there is the case of an 18-year-old boy, who, after losing a leg in an industrial accident, was placed in employment training with a baking company and is now a regularly qualified and salaried employee at a skilled task. Other slides show the progress of two young women who lost their right hands while operating presses in industrial establishments and have been trained for clerical work so that today they have more congenial and remunerative employment than before they were hurt.

American exhibits at the exposition will be guarded by a detachment of the marine corps, 150 strong. These men come from a number of camps, and many are members of the famous marine organization which fought at Belleau Woods in July, 1918. Others are youngsters in the service. The selection for duty in Brazil comes as a reward for good conduct and general merit.
